Be ready to let your rejuvenated legs take you further with novita The M Series® Foot Massager FM600 today!

HOW IT WORKS

SHIATSU MASSAGE TECHNIQUE

A trigger point massage that targets reflex points along the meridian system, Shiatsu aids to restore proper energy flow, promote muscles relaxation and soothe your tired legs after prolonged standing hours.

SCRAPING MASSAGE TECHNIQUE

Commonly known as Gua-Sha, rollers protrude and stimulate the acupressure points on the sole of your feet to ease away stress, fatigue and help strengthen the immune system.

HEAT THERAPY

The warm and soothing sensation spreads throughout the calf and sole region that aids to release built-up tension, reduce muscle stiffness and also stimulate blood circulation for immense relief.

AIR PRESSURE

Let the 14 pairs of strategically positioned air pressure massage units gently knead your tired calves and feet. Ladies who love wearing heels will certainly enjoy the tantalizing relief it brings.
