

EFFECTIVE REMOVAL OF UP TO
99% FREE RESIDUAL CHLORINE
& UP TO 99.99% BACTERIA

EACH
FILTER
gives you
1,500ℓ ≈ 3750 cups
OF PURIFIED
WATER
Up to 5 Months, Based on 10ℓ/day usage

SAVE UP TO 33%
OF WATER USAGE
IN SHOWER MODE

Novita Faucet Water Purifier NP 200

Novita Faucet Water Purifier NP 200 gives you purified water straight from your tap! Adopting a 2-step ultra-purification system, Granular Activated Carbon removes up to 99% of free residual chlorine and effectively improves the water's taste and quality. Advanced Ultra Hollow Membrane Filter removes up to 99.99% of bacteria and suspended colloids of up to 0.1 micron while retaining essential minerals in the water. Equipped with a digital filter lifespan indicator, NP 200 smartly and conveniently keeps track of your customized usage and prompts for timely filter replacement. Minimize water wastage today with smaller perforated openings at the dispensing outlet that helps conserve up to 33% of your water usage at shower mode. Japan-made, the NP 200 is definitely all encompassing, satisfying your drinking, cooking and cleaning needs!

SPECIFICATIONS

Dimensions (W x D x H)	116 mm x 132 mm x 77 mm
Body Weight (At full capacity)	422 g
Type of Body Material	Polyacetal & ABS Resin
Filter Content	Granular Activated Carbon & Advanced Ultra Hollow Membrane (Polysulfone)
Filtration Flow Rate*	2.0 L/minute
Minimum Dynamic Water Pressure	70 kPa
Filtration Capacity	1,500 Litres (Up to 5 Months, Based on 10 L/day usage)
2-Step Ultra Purification	Step 1: Granular Activated Carbon Step 2: Advanced Ultra Hollow Membrane

*Filtration flow rate may vary and subjected to nature of water source, pressure and filter usage

PRODUCT FEATURES

- 
2-STEP ULTRA FILTRATION
- 
ADVANCED ULTRA HOLLOW MEMBRANE FILTER
- 
DO-IT YOURSELF
- 
OPERATIONAL EASE
- 
DIGITAL FILTER LIFESPAN INDICATOR
- 
WATER CONSERVATION
- 
FILTER CHECK WINDOW

NOVITA FAUCET WATER PURIFIER NP 200 FOR GOOD DRINKING QUALITY

SAFE FOR INFANT CONSUMPTION

DRINK TO WELLNESS

QUALITY TASTE IN FOOD PREPARATION

REMOVE CHLORINE

REMOVE IMPURITIES

REMOVE UNPLEASANT ODOUR

REMOVE UNWANTED CHEMICALS

ENRICH FLAVOUR

IMPROVE TASTE

DRINK BETTER

WITH FAUCET WATER PURIFIER NP 200

1 STEP 1:

The granular activated carbon adopts adsorption and catalytic reduction mechanism for enhanced and improved purification efficiency. Provides activated carbon filtering to remove up to 99% of free residual chlorine, VOCs and other impurities. It also deodorize, improve colour and taste of water.

2 STEP 2:

The Advanced Ultra Hollow Membrane Filter adopts ultra-fine hollow fibre microporous membrane technology to provide extensive physical size exclusion filtration to remove suspended colloids up to 0.1 micron while keeping essential minerals intact. Furthermore, it also eliminates up to 99.99% of bacteria to assure you with quality drinking water standard.
