

AIR PURIFICATION & STERILIZATION	
99.99%	Total Airborne Yeast & Mold [†] Count within 10 mins
99.97%	PM2.5 Respiratory Suspended Particulates* within 10 mins
95.95%	Cigarette Smoke [^] within 15 mins
SURFACE STERILIZATION	
99.99%	E. Coli & Salmonella [‡] within 15 mins
99.99%	MRSA [‡] within 30 mins
99.94%	MOLD within 15 mins
98.80%	YEAST within 30 mins

AIRCARE™ CAR STERILIZER NAS C-1000

- 17 Watts
- QuinSystem™ Technology
- Purify, Ionize, Sterilize & Sanitize
- Coverage up to 141 ft³ or 4 m³
- 99.97% True HEPA Filter
- Semi-Permanent Built-in Ionizer
- ≥ 10 Million negative ions per cm³
- Away Mode* controlled ozone concentration up to ± 0.1 ppm

ON THE GO WITH NAS C-1000

Enjoy fresh and clean air on the go in your car with novita aircare™ Car Sterilizer NAS C-1000, a portable and compact unit designed for convenience and the utmost user experience! Keep away from harmful airborne germs, allergens and unpleasant odour with its QuinSystem™ Technology and freshen up your indoor air quality with the millions of negative ions produced. Smartly equipped with a DC Brushless Motor System and an Air Quality Sensor which provides a quick indication of surrounding air quality, you can also activate maximum air sterilization capacity and surface sanitization while you are elsewhere when you turn on the Away mode. Let this handy novita aircare™ Car Sterilizer NAS C-1000 surround you with optimum indoor air quality and beyond.

QUINSYSTEM™ TECHNOLOGY

STAGE 01 GRANULAR ACTIVATED CARBON FILTER

Removes unpleasant odours and chemicals in the air with its highly adsorbent granules. Each granule contains millions of microscopic pores to provide a large surface area capacity to absorb volatile organic compounds, unpleasant odour and airborne chemicals.

STAGE 02 99.97% TRUE HEPA FILTER

High efficiency particulate absolute or HEPA filter employs a densely-packed fiber to remove up to 99.97% of airborne allergens and germs up to 0.3 micrometers in diameter.

STAGE 03 ADVANCED UV NANO PHOTOCATALYTIC OXIDATION (SEMI-PERMANENT)

Coupled ultraviolet light & titanium dioxide (TiO₂) catalyst to boost air purifying capacity by oxidizing airborne germs and volatile organic compounds (VOCs) to keep indoor car air free from harmful pollutants.

STAGE 04 ADVANCED ELECTRON SPRAY IONIZATION (SEMI-PERMANENT)

The semi-permanent built-in ionizer works to purify and freshen up the indoor car air quality through the elimination of airborne allergens and germs with more than 10 million negative ions per cubic centimeter. Besides that, negative ions also help to relieve stress, boost energy level and increase alertness.

STAGE 05 ADVANCED CORONA DISCHARGE MODULE (SEMI-PERMANENT)

The corona discharge module effectively produces controlled ozone concentration which has incredible oxidation capacity against airborne germs and unpleasant odour. Its effective odour control helps eliminate unpleasant odour such as cigarette smoke and prevent them from lingering in the air we breathe.

◇ Granular Activated Carbon Filter and 99.97% True HEPA Filter are combined as a single filter cartridge.

NOTE: • The contaminants are magnified for better illustration purposes only and they are not in actual proportion to the filters. • Image shown is a non-contractual image meant solely for better illustration purposes only.

[†] Actual removal efficiency rate would be better than what is stated due to limitation of analytical equipment. All tests are conducted in specific condition for testing analysis and measurement purposes. Actual results may vary due to environmental and usage condition.
^{*} Haze particulates is tested based on PM 2.5. [^] Cigarette smoke is tested for nicotine.
